GENERAL QUESTIONS:

Please provide any constructive comments specifically with regard to the changes made to this year's conference schedule (addition of formal Friday night programming, addition of more roundtable discussions and skills labs, movement of General Session I to Saturday AM). Did these changes positively impact the overall conference experience? Also, please comment on whether you would attend pre or post conference courses/seminars such as ICS, PHTLS, ACLS etc.

Is there anything you would like to see at a future conference that was not included this year? Please list.

Do you have any additional comments, suggestions, or constructive criticism? Please let us know.

Name and school (required for CME, otherwise optional):

LECTURES AND LECTURERS:

The following specific evaluation of speakers and topics supplements our electronic tracking of continuing medical education credits. It also helps us better determine which topics are most popular and which speakers to invite back. For each Breakout Session, please indicate the lecture you attended, and then rate both the **content** of the lecture and the **presentation** by the lecturer. Finally, offer your comments or state something that you learned from the lecture.
