

**NCMESF - SCAA
CPR/AED Rescue Nominations**

The Sudden Cardiac Arrest Association is sponsoring CPR Rescue commendations to be presented at the 23rd Annual NCMESF Conference in Philadelphia on February 27, 2016. To nominate campus EMS providers who were involved in a successful CPR/AED rescue on campus, please email the following information for each incident to HeartSafe Camus at heartsafecampus@ncemsf.org.

Name of school, campus-EMS squad, and contact info:

Date of cardiac arrest:

Name of survivor (if public information):

Circumstances of incident (indicate if an AED was used):

Link to (or attach a scanned copy) of any press coverage available:

List names of campus EMS providers and certification level (FR, EMT, Paramedic, etc.) who will be present at the NCMESF conference on February 28 to receive recognition (please type names as they should appear on the certificate) and indicate the level for the CPR commendation bar needed (specify the first through fifth rescue) for each individual. Conference attendees will receive one commendation bar each; you may purchase additional bars to be presented later to anyone who cannot attend the conference:

In addition to commendation bars, SCAA also has “Survivor” and “Hero” lapel pins for purchase if you would like to recognize additional people not present at the conference such as other EMS providers, police officers, the survivors, and by-standers who performed CPR when you get back home.

Click here for the responder uniform commendation bar [order form](#). Click here for “survivor” pins, “hero” pins for bystanders who performed CPR, and [other items](#).

Consider holding a recognition ceremony for everyone in the entire chain of survival for a successful rescue including bystanders, police, EMS, hospital staff, physicians, and especially the survivor. Many organizations invite local survivors for an annual re-birthday party with a cake to commemorate their lives and recognize the participants in the chain of survival. Send us pics!

Everyone should consider membership in SCAA, including survivors to promote CPR awareness and AEDs in our communities. There is no charge for membership so please share the [membership link](#).
